# MARCANDO DIFERENCIAS

Es primavera.

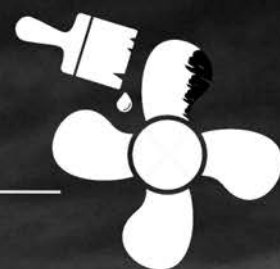

*El frescor del cielo se siente  
como cae sobre la ciudad.*

Ese frescor  
no tiene color,  
*es nitido, transparente*

## EL AIRE Y LA LUZ EN ARMONÍA

# Nuestro compromiso

### Un nuevo reto en innovación

Cada temporada de ventilación decidimos diseñar nuevas propuestas.  
Combinando los nuevos avances tecnológicos con motores de nueva generación,  
mejor rendimiento que equilibran las velocidades para adecuarse a cada situación.  
Un compromiso constante de adaptación a las nuevas tecnologías.  
Creamos ventiladores únicos de líneas refinadas que muestran acabados de  
alta calidad y personalidad propia.

### Innovación

Avanzando hasta nuevos conceptos de ventilación.  
Formas puras y armónicas.  
La fusión entre lo estético y lo funcional pasa por  
incorporar nuevas propuestas que hagan más fácil  
y confortable su vida.

#UNIFORMIDAD  
Convertida en belleza

#COHERENCIA  
Fusión y uniformidad

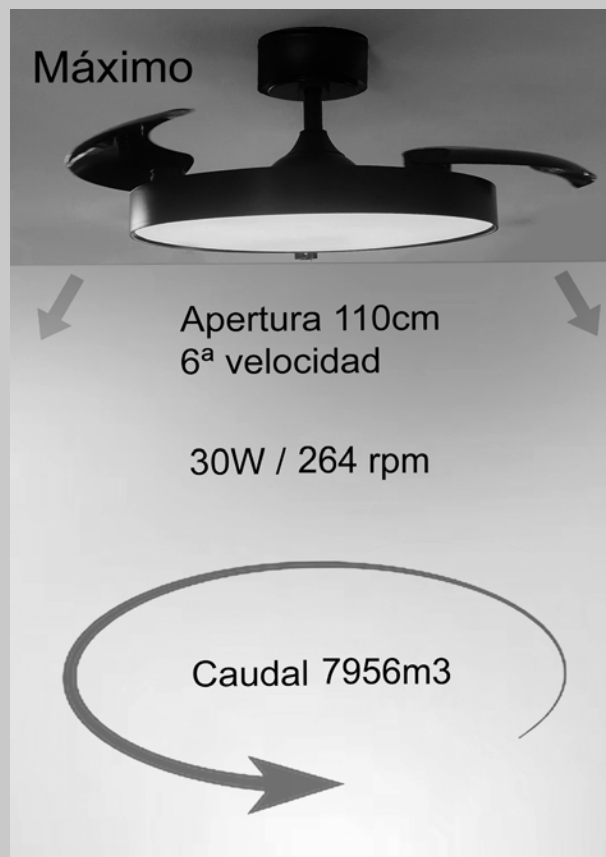

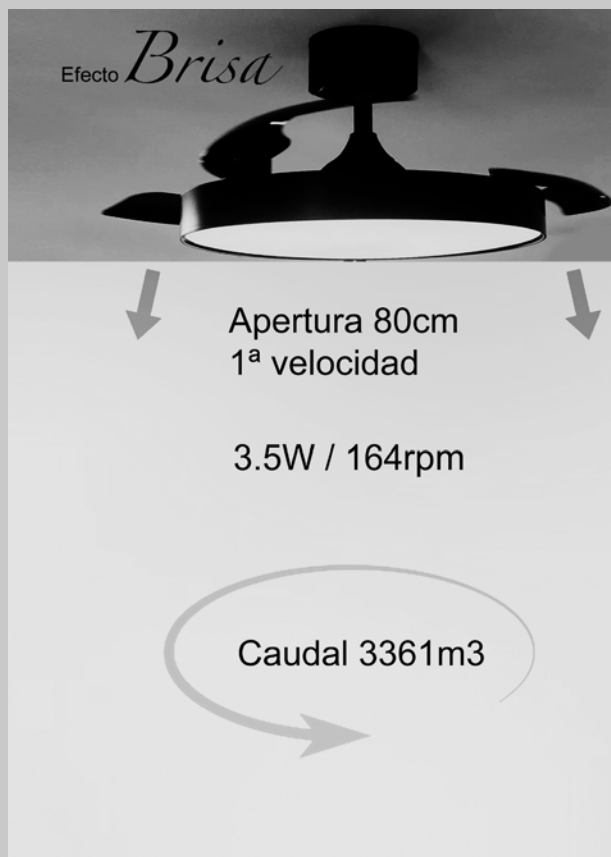

Avanzar

INNOVAR

#EFECTIVIDAD  
Estética efectiva

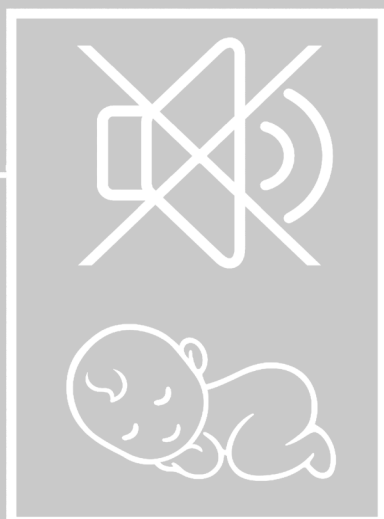

# Adaptación

## Para cada momento

Un flujo de aire excesivo puede llegar a incomodar.

Incorporamos en nuestros ventiladores un efecto BRISA, para esos momentos de entretiempo donde puedas percibir únicamente un frescor confortable.

Una velocidad armónica suficiente para tu confort, disminuyendo tanto el caudal de aire como el diámetro de las aspas.

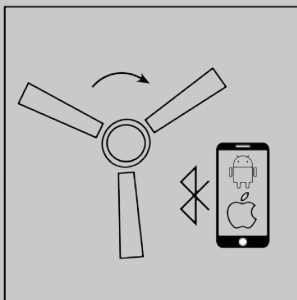

## Para cada momento

Nuestros mandos incorporan un control que silencian el testigo sonoro del ventilador. Tu decides que opción prefieres.

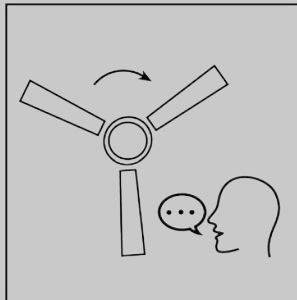

# Funcionalidad

## Fórmulas de distinción

Una estrategia de adaptación y un compromiso de mantener la calidad que caracteriza a la marca JUEPIC.

GESTIÓN APLICACIÓN

GESTIÓN POR VOZ

## Conectividad

Desde el tradicional teclado del mando a distancia pasando por las opciones de control por voz, aplicación móvil y la solución del controlador en pared para espacios comunes.

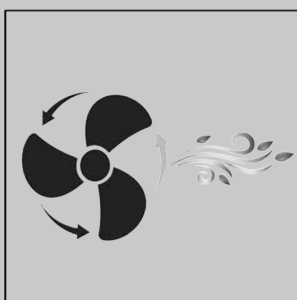

## Retractiles con diseños sólidos y sutiles

Rediseñar un tipo de ventilador muy característico y estandarizado no es tarea fácil.

Todas nuestras colecciones están montadas sobre estructuras metálicas.

Ventiladores más contemporáneos.

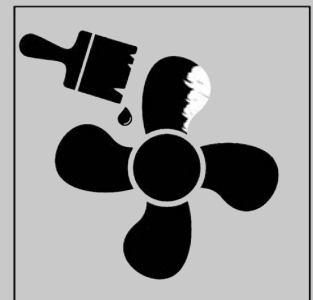

Las colecciones como París, Roma, Sidney o Brillant aportan un estilo homogéneo y compacto, debido a sus aspas integradas en el mismo color que el cuerpo del ventilador, junto a un elegante florón cilíndrico.

EFEECTO BRISA

ASPA NEGRA

# Control con voz

VOICE CONTROL

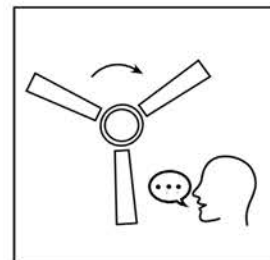

Imagina poder controlar la iluminación, la temperatura o la seguridad de tu hogar simplemente con tu voz.

Esto no solo es posible, sino que se ha convertido en una realidad accesible gracias a los avances en tecnología de reconocimiento de voz y sistemas de automatización.

Control por voz en la domótica, sus beneficios, y cómo puede ayudarte a integrar estas soluciones en tu proyecto, asegurando una experiencia fluida y eficiente.

El control por voz puede transformar tu entorno y mejorar tu calidad de vida.

Sin manos, simplemente con una serie de frases establecidas.

GESTIÓN POR VOZ
